The Fujikura Fit-On FLIGHTSPEED RED series is engineered to have a linear flex profile that loads evenly across the length of the shaft. The slightly heavier Red series is geared toward spin reduction for the stronger or higher ball flight player.

What **Today's Golfer Magazine** say about these Seve Icon Drivers:

"This big boy features added perimeter weighting to help maximise distance on off-centre hits – and it was an accurate piece of kit. The dispersion figure was worthy of five stars, and our guys were big fans of the solid feel and noise that the Seve Icon made at impact. A very impressive package for less than £150. So, if you're on a budget but want quality, this could well do the job.."
